

Changing Channels Workshop

January 26, 2018

8:30 am-5 pm

**Cloverdale Citrus Fairgrounds Auditorium, 1 Citrus Fair Drive
Cloverdale, CA 95425**

A review and discussion of the science of stream restoration in the Russian River Watershed

Topics will include: the geomorphic and watershed processes creating entrenched channels; limitations to riparian and aquatic habitat in entrenched channels; influences of historical developments on present day creek form and function; examples of restoration techniques that address entrenchment; and a discussion of the effects of recent fires on creeks.

Featured Speakers:

**Dr. Matt Kondolf & Dr. Doug Shields, Russian River Independent Science Review Panel
Drs. Lorraine & Alan Flint, Climate Scientists, USGS
Dr. Brian Cluer, NOAA
As well as staff from local agencies and projects**

Registration \$20.00 per person includes lunch and snacks
