

Water Management: Past and Future Adaptations

Fall 2018 Interdisciplinary Faculty Seminar Schedule

223 Moses Hall (unless otherwise indicated)

24 August 10a-1p

City-river interactions across time. Rubina Raja (University of Aarhus) and Alan Farahani (University of Nevada Las Vegas)

04 September 330-5p

Integrated water management: floods, water supply, and wastewater in Casablanca. Dalila Loudyi (Hassan II University of Casablanca, Fulbright scholar at Stanford University)

11 September 330-5p – Rm 315A Wurster Hall

Parallel trends in river evolution across continents in the Anthropocene: implications for sustainable water and environment. Peter Downs (University of Plymouth)

12 October 1030-1p – Rm 1000 Wurster Hall

Managing sediment at the river basin scale: too-much or too-little sediment across borders. Steve McCaffrey (McGeorge Law School), Rafael Schmitt (Stanford University), Mike Kiparsky (Boalt)

26 October 1030-1p

Managing sediment at the river basin scale: sediment-starved rivers and sand rights for the coast. Carrie Monohan (Sierra Fund), Katherine Stone (MWGJF, retired), discussant: Holly Doremus (Boalt)

02 November 1030a-1p

River and reservoir sustainability in a monsoon climate: experience from Taiwan. Hsiao-Wen Wang (National Cheng Kung University Taiwan)

16 November 1030-1p

Coastal impacts of sediment starvation. TBA
